FERMOB

IN A FEW DATES

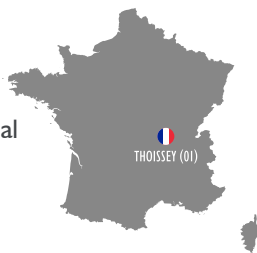

WELCOME

TO FERMOB

A French company that relies on three high-performance industrial sites located near Lyon

- Thoissey: 14,000 m²
- Macôn: 10,000 m²
- Anneyron: 24,000 m²
- Including more than 305 employees
- Turnover of € 121 M in 2022

Manufacturing with creative added value

- In-house design studio

A strong reputation in France and abroad, among the general public and professionals

- Marketing in more than 65 countries
- 50% of turnover from exports

Strong values deeply rooted in the culture of the brand and the company

- Joie de vivre
- Affordable
- Inspiring
- Detail-oriented

Fermob: Metalwork

- A splendid and inspiring material
- More than 5,000 tonnes of metal (steel and aluminium) transformed annually
- More than 690,000 parts manufactured annually
- More than 200,000 metal Bistro chairs manufactured in the Thoissey factory each season

Expertise: the mastery of colour

- A unique colour palette with a colour chart composed of 25 colours, updated every year to combine, attract and inspire...

You can use our product daily all over the world :

Times Square, New York - USA

Coca-Cola Museum, Atlanta - USA

Grace Santorini Hotel, Santorin - GREECE

Molitor, Paris - FRANCE

FROM PARIS
TO NEW YORK,
TO SINGAPORE

Mc Donald's, Lyon - FRANCE

Bikini Hotel, Berlin - GERMANY

Maxx Royal Hotel, Antalya - TÜRKİYE

FERMOB

THE ART OF GOOD LIVING FOR EVERY SPACE

Cafés that come to life with different chair arrangements, afternoons spent lazing in an armchair under a pergola, meals shared with loved ones around a dining table, a table lamp that can be snuck into the garden to light up your kitchen table...

Since 1989, Fermob has been creating a universal and immediate link between the environment and its inhabitants, bringing reality to life moments, where art and lifestyle are guided by high quality, meaningful design.

Our furniture has timeless appeal: the perfect illustration of French style that has been adopted world-wide. The French brand adorns the world's largest squares as well as tiny Parisian balconies, while also breathing its boundless, colourful energy into every space.

Today, it has not only revolutionized existing outdoor spaces and taken away the barrier between indoor and outdoor living, it also promotes smart ways to merge the spaces.

The furniture thus plays the complementarity card, adopting new materials and colours to step indoors.

Multi-purpose lamps design atmospheres to set the mood from the garden to the living room.

The result?

Avant-garde pieces by designers who combine expert craftsmanship with industrial performance and creative audacity to meet the flexible needs of today's spaces.

A colour chart with 25 shades and a range of clever accessories that create lasting emotions for unique locations that reflect every personality.

This year, Fermob has introduced new materials to its ranges -wood and leather, Exploring the indoor world with new versions of its emblematic products.

In the open air or inside the home, we all have a Fermob experience to enjoy.

FERMOB

MANUFACTURER OF FURNITURE DESIGNED FOR OUTDOOR USE

Fermob has been designing and manufacturing outdoor furniture for 35 years. A universe that requires specific expertise and know-how through adapted materials and treatments.

FERMOB: MATERIALS AND TREATMENTS FOR OUTDOOR USE

FERMOB : THE COLOUR EXPERT

A UNIQUE RANGE

Fermob has been famous for colour since 1996. Bernard Reybier quickly understood colour is what makes a garden distinctive, creates atmosphere on a terrace, adds **personality to an item of furniture and establishes a sense of boldness...**

In a market that was once limited to two shades (English Green and White), the brand revolutionised the sector by offering an **original colour chart of bright, intense and contrasting colours**. Today, Fermob has further developed its **colour expertise** with more **subtle shades**, making it possible to **play with different hues** and compose your own palette. **25 unique colours**, 25 ways to make our furniture happy, 25 degrees of intensity, 25 shades of light... Our colours are designed to flourish out there on their own, to be **coordinated** and **bring out the best in each other**. For an **infinite number of combinations**, plenty to make every terrace and patio unique.

We add one or two new shades to our colour chart every year.

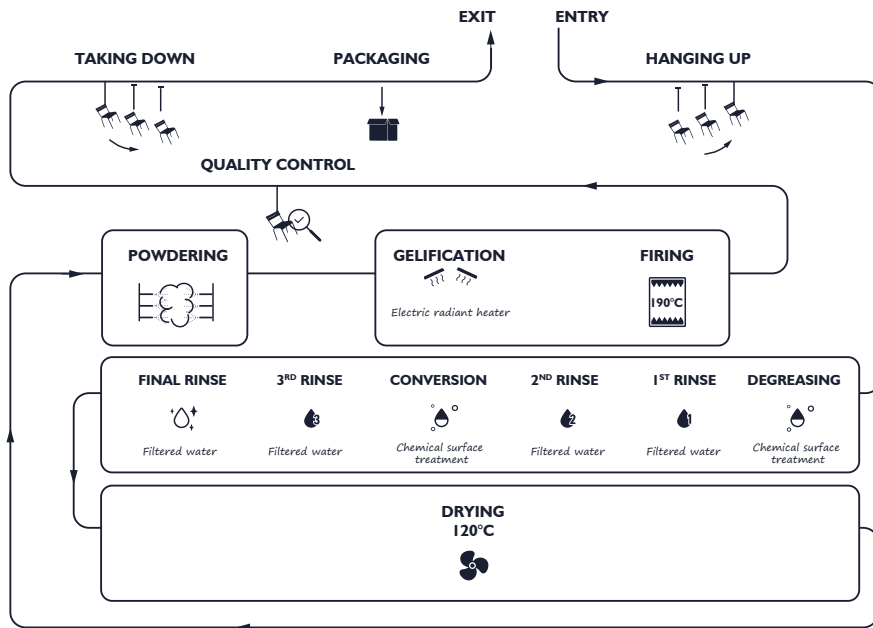

Our colours are fit for **demanding outdoor use**. We carry out intensive testing before every launch, so that we can guarantee:

- **lightfastness**
- **scratch resistance**
- **UV resistance**
- **moisture resistance**

HIGH PERFORMANCE INDUSTRIAL FACILITIES

The company has ensured that it has the means to achieve its ambitions and now owns **the most advanced painting line anywhere in the world** ! It takes just **6 minutes to change paint colours** and the line can handle every shade of the colour chart in just 3 days, proving this impressive industrial tool's **flexibility and reactivity**.

Painting process on the historic Thoissey site

All Fermob metal products are painted with a **100% polyester powder coating**, which offers better UV resistance than standard epoxy paints. The paint is **applied electrostatically to the furniture for an optimal coverage**, then baked at very high temperature.

To improve anti-corrosion performance, we apply **surface treatments** (galvanisation, electro-galvanisation, electrolytic coating) **before painting, either as standard or as an added option.**

Electrogalvanising : Protecting an object by applying a layer of zinc using electrolysis (electrical energy).

Galvanisation: Iron protection process that involves dipping a part into a bath of melted zinc.

Electrolytic coating : A surface treatment originally used in the automotive industry. An electrophoresis paint (sub-layer) technique where a part is immersed in a bath of water-soluble paint. Electrolytic coating means that the product benefits from Very High Protection treatment and is suited to intensive use or use in extremely wet/humid environments.

Electrostatic : An eco-friendly painting technique that involves using powder instead of solvent-based paints. An electrostatic force attracts the powder coating to the metal, achieving optimal coverage. The coating is then baked onto the furniture.

FERMOB: A UNIQUE KNOW-HOW

THE METAL: WONDERFUL MATERIAL OF IDEAS

For our furniture, we choose to use **metal** (over 98% recyclable) – the “**material of ideas**”, as Gustave Eiffel put it – on account of its incredible versatility. The metals we use are **premium-grade steel and aluminium**.

STEEL

- Fermob's original expertise
- Stable and durable
- Creates an elegant design

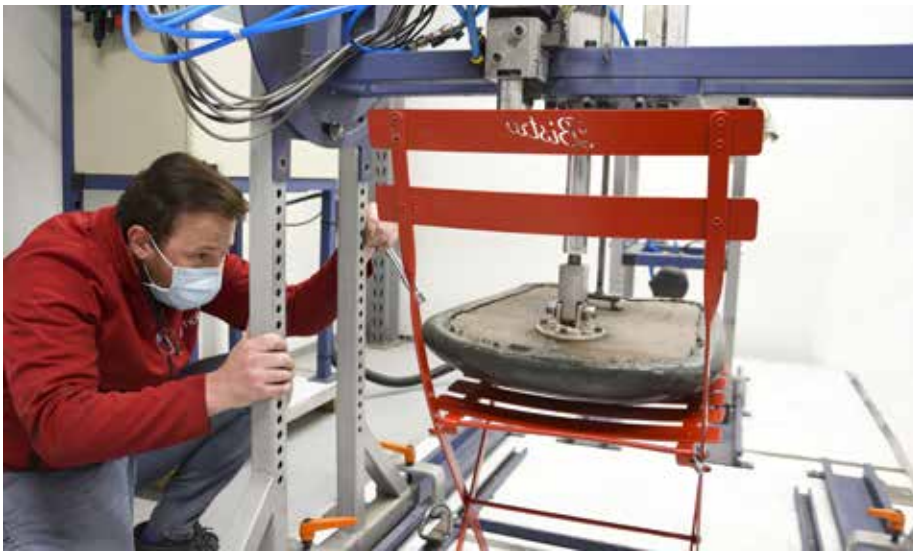

ALUMINIUM

- Malleable
- Light-weight
- Easy to weld

Cold-rolled steel : The laminated steel is passed through a set of rollers, which transform it into material (e.g. into sheet for table top). Cold rolling is Fermob's technique of choice, since it makes the steel resistant, gives it a precise, uniform thickness, and promotes good paint hold.

Whenever our designers and technicians are working on a new product, **anti-corrosion performance is always top of mind**. We're constantly thinking of ways to eradicate, or at least reduce, areas that could be prone to corrosion because they are not protected or treated.

Examples of **corrosion-prone areas** include:

- rims under table tops
- air gaps
- tubular parts
- areas subject to friction, such as folding mechanisms
- areas where the properties of the material have changed as a result of heat (such as from laser cutting or welding).

Fermob furniture benefits from anti-corrosion treatment specifically for outdoor use and undergoes intensive tests at our laboratories, in accordance with **general standards on safety** (NF EN 581-1), **stability** (NF EN 1022), and **resistance and durability** for collective use (NF EN 581-2, NF EN 581-3).

ANTI-CORROSION PROTECTION RATING

Fermob has introduced a new **Anti-Corrosion Performance Rating (IPAC)** for all metal items of furniture. The rating is an indication of the product's anti-corrosion performance, combining three factors: **design, material and surface treatment**.

Since all our items of furniture are designed for outdoor use, we systematically apply a surface treatment and high-performance outdoor paint to offer the very best protection against corrosion.

On a scale from 1 to 10, all Fermob furniture has a minimum IPAC rating of 6.

All products bearing this logo are eligible for additional, **optional anti-corrosion treatment** (contact our sales department).

The 1st figure gives the basic rating and the **2nd figure in the upper right-hand corner gives the IPAC after additional treatment**. Depending on the products and their design, the IPAC enhancement may be different.

IMPACT PEOPLE'S MIND

NOT NATURE !

Fermob furniture is designed to live outdoors, and is made using materials and processes that respect the environment. Environmental concerns have always been at the heart of the design and aesthetic qualities of Fermob's creations, together with their lightness and resistance, helping us **save materials** and **limit waste** as well as **transport impact**.

ECO-DESIGN

METAL : AN ENVIRONMENTALLY FRIENDLY CHOICE

Approximately 98% of all iron and aluminium is now recycled worldwide. This means that Fermob can guarantee that its furniture is **fully recyclable – and recycled**.

ECOLOGICAL PAINT THAT PROTECTS BOTH THE ENVIRONMENT AND YOUR HEALTH

The powder paint used by Fermob contains **no solvents**. It is **100% recycled and recyclable** and it is applied in a **zero-waste facility**, with successive dips making our products guaranteed for outdoor use.

Zero discharge of polluted water thanks to the use of a carefully balanced successive-dip process in the surface treatment tunnel.

Zero atmospheric emissions heat from the ovens is even recovered to heat the metal treatment baths!

Zero powder waste our solvent-free, 100% polyester powder coating is applied without water via a closed-loop process, meaning that any surplus powder is collected via suction and reused.

Because this facility is a **classified installation on environmental protection grounds**, Fermob has specific obligations and responsibilities that echo its commitment to the environment. The brand is also part of a program that aims to reduce the release of dangerous substances into water.

CONTINUALLY IMPROVING OUR ENVIRONMENTAL IMPACT

Optimising energy consumption remains one of Fermob's key concerns, as regularly demonstrated through **concrete actions**:

- **Reducing the temperature** of our ovens (-10°C in 25 years),
- Setting up a **stoving process that consumes 10% less energy**,
- Investing in a **new painting line**, saving 8 tons of powder per year,
- **Reduction in our water use** (30% reduction in 5 years),
- **Reduction in our electricity use**, with the addition of LED lighting (5% reduction in 5 years).

RECYCLED AND RECYCLABLE PACKAGING

For many years, Fermob has been a member of **CITEO**, our eco-organisation tasked with collecting and sorting packaging.

We help turn our everyday products into new resources, and we are firm believers in getting the packaging just right-using eco-designed packaging that contains as few raw materials as possible.

In compliance with France's AGECL law of 10 February 2020 (anti-waste law to promote the circular economy), we use the TRIMAN system on our labels to inform consumers of the waste sorting rules concerning our furniture, its packaging and documentation. The TRIMAN logo comes with an information box indicating the sorting or waste disposal instructions for the various elements.

EXTENDING SERVICE LIFE

Some of the product components can be replaced if they become worn or damaged over time.

Our catalogue includes a range of spare parts: protective pads for chairs and tables, glide pads, cushion covers, etc. (see detailed list in our price list).

MANAGING END OF LIFE

Fermob has been working with Ecomaison since 2013; this eco-organisation collects and restores used furniture to give it a second life or ensures the recycling of its materials

Ecomaison's missions are to collect and sort used items of furniture, and to meet the recycling and recovery targets set by public authorities. Fermob commits to this process by:

- Upholding a long-standing tradition of creating **eco-designed** products
- **Informing and raising awareness among its consumers** on the use of eco-participation
- **Promoting donation and reuse in partnership** with players from the non-profit sector

RE-PAINT

GIVE NEW LIFE TO YOUR FURNITURE

Do you have a piece of Fermob furniture that holds special memories for you? Over the years, the colours of our precious Fermob products may fall out of style or show signs wear.

GIVE NEW LIFE TO YOUR FERMOB FURNITURE, RE-INVENT IT: WE PROPOSE AN INNOVATIVE SOLUTION!

Fermob has joined forces with Axalta, its paint supplier and long-standing partner, to offer a brand-new solution to renovate your Fermob furniture, **via a certified network of galvanisation re-paint professionals. Available in France for now.**

Exclusive partnership with:

HOW DOES IT WORK?

1. Submit your request online via <https://re-paint.com/renovation-fermob>, selecting your nearest painting renovation professional.
2. Fermob checks the authenticity of the furniture, then sends the request to the re-paint professional who validates the feasibility of the renovation and proposes a quotation.
3. After validation of the quotation, you drop your Fermob furniture off at the premises of the re-paint professional.
4. The re-paint professional renovates your furniture.
5. The carefully-finished result will last for years!

KEY FIGURES

- More than 160 eligible Fermob products
- A selection of 15 exclusive Fermob colours
- A network of around forty professionals in France, located within 80km of your address.

Respect of the environment FERMOB STEPS UP ITS COMMITMENTS!

Since the company was founded, **Fermob has naturally strived to protect its environment and create sustainable products:** solvent-free and water-free paint, recyclable materials for its furniture, zero-waste painting process, heat recycling, workstation ergonomics, etc. Our entire manufacturing process complies with the **highest quality standards.**

Today, Fermob takes another step forward, completing its environmental commitments with a **local paint renovation network:** re-paint. Not only does this solution extend the life-time of your Fermob furniture, but being local, it limits the transport involved in the operation and thus **its carbon footprint.** This ambition corresponds perfectly to the challenges of our social responsibility and the changes in our lifestyles.

THE FERMOB GUARANTEE

CHARTER

EUROPEAN FURNITURE GUARANTEE

When we design our products, we pay special attention to three key aspects:

- making sure the piece will continue to fulfil its intended purpose for many years to come
- anticipating how it will age as time passes
- designing it so it is suited to our customers' requirements.

As a manufacturer, we have a duty to guarantee that our products are fit for purpose, no matter how our customers use them.

We never stop listening to our customers. That is why we have amended our European Furniture guarantee to reflect painstaking laboratory testing and customer feedback.

Because we use only the highest-quality materials and finishes, we are now in a position to go one step further and offer two separate guarantees – a **5-year functional guarantee** on all our items of furniture, plus a **2-year ageing guarantee**, provided that the product is used as per our recommendations.

FUNCTIONAL
GUARANTEE
5 YEARS

AGEING
GUARANTEE
2 YEARS

Each of our products comes with a recommended usage setting, so you can better cater to your own customers' requirements and keep the guarantee valid:

1. **Domestic:** product designed for private use in non-public spaces such as gardens, winter gardens, patios, terraces and balconies.
2. **Professional:** product designed for professional use in supervised public spaces such as restaurants, outdoor pools, beaches and recreational facilities.
3. **Intensive professional:** mobile product, not fixed to the ground, designed for professional use in unsupervised public spaces such as motorway service stations, public parks and squares that are accessible around the clock.

• 5-YEARS FUNCTIONAL GUARANTEE

Fermob guarantees that products will remain fit for the purpose for which they were designed for 5 years. The guarantee covers all functional aspects of the product such as welding, fasteners, rivets and folding.

If a product is not used as per Fermob's recommendations, the functional guarantee is reduced to 2 years.

• 2-YEARS AGEING GUARANTEE

The speed at which a product ages depends on how carefully it is treated by customers. Please read the exclusions so you can advise customers how to care for and maintain their products.

The ageing guarantee covers premature and abnormal deterioration in the appearance of the product's materials.

Fermob's 2-year ageing guarantee applies in Europe (excluding Russia) only. Elsewhere, the guarantee is 2 years for aluminium furniture and 1 year for steel furniture.

THE AGEING AND FUNCTIONAL GUARANTEES DO NOT COVER:

- Damaged, converted or modified furniture.
- Furniture not used as per Fermob's recommendations.
- Any damage arising from insufficient care, or from failure to comply with the supplied instructions and advice for receiving, assembling, using, maintaining and storing furniture supplied to the customer.
- Rings or stains undeclared when unpacking (including stains related to a combination of humidity retention + heat).
- General wear and tear or natural fading of the materials used.
- Corrosion originating from scratches or abrasions that result from general wear and tear and which cannot be removed via standard cleaning and maintenance processes.
- Minor spots of rust under table tops and seats or on bases. These are a natural outcome of the material used (iron) and can be treated using the maintenance tools made available to customers by Fermob.
- Corrosion of stainless steel parts due to use in a confined, and/or chlorinated environment.
- Corrosion of steel furniture (including stainless steel furniture) as a result of use in a coastal environment.
- Any changes in the visual appearance of wood that are directly linked to ageing. As wood is a living material, the appearance of its surface changes naturally over time.
- Irregularities in the leather are proof of its authenticity
- Patina and ageing may alter the appearance of the leather over time. Leather is a natural, living material whose surface condition evolves over the years.

This guarantee is limited to reimbursement (with application of a reduction) or replacement of the product, and applies only upon presentation of the purchase receipt (cash register slip or purchase invoice).

EUROPEAN LIGHTING GUARANTEE

Our lamps are subject to the applicable European legal guarantees. They comply with European standards and certifications (e.g. NF EN 62262).

THE LIGHTING GUARANTEE SPECIFICALLY EXCLUDES THE FOLLOWING:

- Modified or transformed lighting products.
- Lighting products that have been repaired using components not supplied by the brand, or without following the instructions provided by Fermob.
- Lighting products that have been used in a way not recommended by Fermob.

The exclusion conditions concerning changes in the appearance of the wood are the same as those for Fermob furniture (see above).

USE	DOMESTIC	PROFESSIONAL	INTENSIVE
GUARANTEE	2 YEARS	1 YEAR	-

EUROPEAN PARASOL AND ACCESSORY GUARANTEE

Fermob parasols and accessories (cushions, etc.), like our furniture, are designed to last being made from carefully selected materials. They are guaranteed according to European legal conditions.

- Acrylic and PVC textiles are guaranteed against UV, abrasion, mould and tearing.
- Reticulate foam fillings are guaranteed against mould.

THE PARASOL AND ACCESSORY GUARANTEES SPECIFICALLY EXCLUDE THE FOLLOWING:

- Modified or transformed parasols or accessories.

THE LIGHTING, PARASOL AND ACCESSORY GUARANTEES SPECIFICALLY EXCLUDE THE FOLLOWING:

- Deterioration due to lack of due care or non-compliance with user instructions for maintenance and storage (for example, closing the parasol during bad weather).
- Marks or stains not declared on unpacking.
- Natural wear and fading of materials used.
- Start of corrosion due to scratches or abrasions caused by use, which cannot be eliminated by normal cleaning and maintenance.
- The exclusion conditions applicable to Fermob furniture also apply to the metal components of lighting products, parasols & accessories (see above).

These guarantees are limited to refunds (on condition that a usage discount is applied) or replacement of the product, and only apply on presentation of proof of purchase (receipt or invoice for the purchase).

For intense use of a light, parasol or product accessory, please contact our sales department, whose teams will provide you with all the information necessary for this type of use.

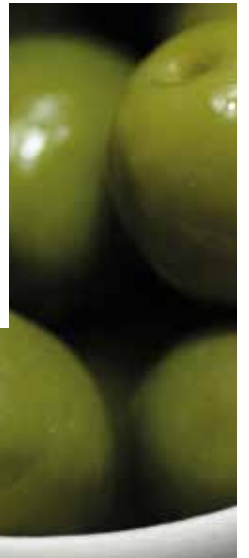

For all countries outside the European Union, the country's own legal guarantee will apply.

FABRICS CHARACTERISTICS

Water repellent fabric

Machine washable at 30°C

Removable covers

Brush the fabric if there are stains or other marks

GLOSSARY

ACRYLIC

Synthetic fibre that is soft and silky to the touch, does not pill, and is ultra-light.

- extremely resistant to tearing and wear
- rotproof (i.e. prevents the formation of mould)
- keeps its shape
- UV and fade resistant
- does not retain heat or moisture
- resistant to temperature variations (-30° to +70°C)
- resistant to chemicals
- easy to clean: machine-washable at 30°C, no ironing required.

All our acrylic fabrics are water-repellent.

CAST IRON

Cast iron is a carbon-rich iron alloy. Its density, weight and sturdiness mean that it is ideally suited for stability purposes.

COATING

A treatment process in which a coating is applied to the surface of a textile to make it waterproof.

SOLUTION-DYED

Fermob uses solution-dyed textiles (the dye is applied to the fibre, not the surface). This dyeing technique means that the colour lasts five times longer than a conventional dye.

STAINLESS STEEL

Stainless steel is an alloy of steel and chromium that is highly resistant to corrosion and rust. Fermob uses stainless steel to make the screws for its products.

SILENCING PADS

An exclusive, patented technology that allows furniture to slide effortlessly across the floor and features an integrated shock absorber to reduce vibrations. Comes as standard on Croisette, Facto, Kate, Luxembourg®, Luxembourg® Kid table, Monceau, Pétale, Rythmic, Salsa, Stripe and Studie.

NOISE REDUCTION OF 14 DB = 10 TIMES QUIETER!

WATER-RESISTANT

Offers long-lasting protection against moisture.

SALSA & ÉVASION

PARASOLS & ACCESSORIES' COLLECTIONS

Fermob has harnessed all of its outdoor expertise and audacious attitude to bring you a comprehensive **product range for outdoor spaces**. Over five years ago, the brand launched a series of **collections of decorative accessories and outdoor fabrics** – trays, trivets, decorative cushions, round cushions for chairs, fouta towels, garden ponchos, and more – that complement its core product range and are **specially designed for outdoor living**. Now, the brand is going even further as it looks to cement its unique brand positioning. Drawing on the **know-how of Vlaemynck**, a French supplier of parasols and outdoor furniture to the hotel and restaurant industry, Fermob has added a **brand-new type of product** to its range: **parasols**.

WHAT MAKES A GOOD OUTDOOR FABRIC?

- A fabric that has **technical qualities enabling it to withstand sustained outdoor use without deteriorating** (colour-fastness to UV rays, water-repellent, resistant to stains and mould, etc.)
- A **fabric that's easy to keep clean** (removable cover, machine-washable, etc.).

Colour-fast
in the sun

Water-repellent
treatment

Breathable:
quick-drying

Anti-stain
treatment

Tearproof
and resistant to
abrasion

Removable
covers

Machine
washable

Abrasion : Wear caused by rubbing.

Anti-UV : Anti-UV treated products are resistant to alteration caused by ultraviolet rays (present in sunlight and moonlight), meaning colours do not fade over time. All Fermob products are UV-resistant.

Water-repellent : A water-repellent fabric does not instantly absorb water droplets. Instead, water slides off the surface. This increases the resistance to stains and mould. However, if the water is not removed quickly, it will end up being absorbed into the fibre (water-repellent is not the same as waterproof).

Rotproof : Guarantees against the formation of mould over time. This is an important guarantee for outdoor products.

For its decorative accessories and parasol, Fermob has chosen to work with **manufacturers who have genuine outdoor know-how** (like Serge Ferrari, Marguero and Tuva Textile) to ensure that its customers can enjoy a high-quality product, whatever they use it for. Like all Fermob products, they incorporate the fundamentals of the brand: **creativity, design, colour**, and combine an attractive appearance with **originality and technicality**.

QUALITY GUARANTEED

Fermob's accessories are built to the same high standards as the brand's other products :

- Metal accessories (trays, trivets, etc.) are manufactured in the same factories as Fermob furniture, meaning they are designed with the exact same materials (metal, paint, etc.).
- Textile accessories (cushions, etc.) and parasol are designed in conjunction with experts (stylists, designers, manufacturers, etc.), all selected for adhering to the same exacting standards as Fermob. All our fabrics are sourced from partners in France or the European Union. Our **Jacquard fabrics**, **printed fabrics** and **Batyline® Outdoor Technical Fabric (OTF)** are all **made in France**.

All Fermob textile accessories are made with fabrics that meet relevant standards and undergo resistance tests.

- Colour-fastness (sunlight and inclement weather) standards : ISO 105-B04 & 105-B02
- Abrasion and friction resistance standard : ISO 12947-1 (Martindale's method)
- Tear resistance standard : ISO 13937

OUR CARE AND MAINTENANCE RECOMMENDATIONS

To preserve their original appearance, most of our materials require **basic precautions**. They can be damaged, to a varying extent, depending on the product type, by:

- **mechanical** factors: wear and tear, scratches, impact, distortion, etc.
- **chemical** factors: acids, bases, solvents, etc.

Cushions must be brought inside during bad weather.

MAINTENANCE OF OUTDOOR TECHNICAL FABRIC (OTF)

Use soapy water or Fermob multi-purpose cleaner.

Spray or apply with a **soft sponge**.
Rub gently with a soft brush.
Rinse with water.

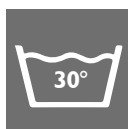

Wipe clean.

N.B. Very dirty surfaces may require a second cleaning.

MAINTENANCE OF ACRYLIC FABRIC (YARN-DYED / SOLUTION-DYED)

Gently brush the fabric if there are stains or other marks.

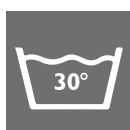

Machine-wash on a gentle cycle compatible materials, following the recommendations on the label.

Iron the fabric if necessary.

MAINTENANCE OF COTTON FABRIC

Machine-wash on a gentle cycle compatible materials, following the recommendations on the label.

Iron the fabric if necessary.

N.B. Prefer 800 RPM spinning.

MAINTENANCE OF METAL

See PROTECTION & MAINTENANCE chapter.

Water repellent fabric

Machine washable at 30°C

Removable covers

Brush the fabric if there are stains or other marks

Iron-safe

ACRYLIC

Synthetic fibre that is soft and silky to the touch, does not pill, and is ultra-light.

- extremely resistant to tearing and wear
- rotproof (i.e. prevents the formation of mould)
- keeps its shape
- does not retain heat or moisture
- resistant to temperature variations (-30° to +70°C)
- resistant to chemicals
- easy to clean: machine-washable at 30°C.

All our acrylic fabrics are water-repellent.

DRALON®

A woven textile made from synthetic fibre that offers excellent resistance to water, stains and UV rays. It is soft in texture, bright in appearance, rot-proof and easy to clean.

COATING

A treatment process in which a coating is applied to the surface of a textile to make it waterproof.

FOAMS

ETHYLENE-VINYL ACETATE (EVA) FOAM

A dense, compact, hard-wearing foam (no cells or air bubbles) that's lightweight and easy to mould.

HIGH-RESILIENCE PU FOAM

A polyurethane foam selected by Fermob for its ability to return to its original shape after deformation, even following an extended period of use.

OPEN-CELL FOAM

A foam that allows liquid to pass through. It does not retain water and dries very quickly, meaning that the cushion does not stay wet.

POLYESTER FOAM

A PU-type foam with open cells and variable density. This versatile foam is typically used to make padding and occasional seats.

POLYETHYLENE FOAM (closed-cell)

A foam used for thermal insulation and for air-, water- and dust-proofing.

POLYURETHANE (PU) FOAM

A high-quality foam known for its firmness and comfort. It consists of fine closed cells enclosing a low thermal conductivity gas. It makes an excellent thermal insulator.

RETICULATED FOAM

A foam with very fine, regular closed cells. This is a rot-proof and waterproof foam.

YARN-DYED ACRYLIC

A yarn-dyed synthetic fibre is dyed on the yarn after it has been manufactured.

SOLUTION-DYED

Fermob uses solution-dyed textiles (the dye is applied to the fibre, not the surface). This dyeing technique means that the colour lasts five times longer than a conventional dye.

JACQUARD FABRIC

On a Jacquard fabric, the patterns are made by criss-crossing threads. The Jacquard loom, developed in 1801 by Joseph Marie Jacquard from Lyon, is capable of creating weaves with complex patterns.

LOUNGE OTF

Outdoor Technical Fabric (OTF) is a Batyline® fabric manufactured in France by the world's leading firm, Serge Ferrari. This high-tenacity 100% polyester thread is protected with a solution-dyed PVC cover for exceptional colour-fastness. OTF keeps its shape, is light, flexible and sturdy, and does not deteriorate over time. It is resistant to both moisture and micro-organisms, and is treated with an anti-fungal product. The tight weave, coupled with the performance characteristics of Batyline®, give this material a textile-like feel and make it ideally suited for outdoor use. Lounge OTF is a unique material which combines the elegance of a natural-looking textile with the performance characteristics of a technical fabric.

THE LIGHTING COLLECTIONS

IN JUST A FEW YEARS, FERMOB HAS BECOME A LEADING NAME IN DECORATIVE AND AUTONOMOUS LIGHTING FOR BOTH INDOOR & OUTDOOR SPACES.

It all began in 2015, when Fermob released the market's very first portable BALAD lamp. Thanks to this product, Fermob became a pioneer with a new concept.

INNOVATION FIRST...

CREATION

Apart from quality, **design is a major commitment for Fermob**. With an approach **inspired by changing lifestyles** and history, the products also combine Fermob's **commitments to simplicity, a feeling for detail and, of course, aesthetics**. As well as forming part of our **overall design vision**, the collections are also in step with our observations of **new uses**. Fermob offers a variety of products (table lamps, pendant lights, wall lights, etc.) for a range of lighting scenarios (with different light temperatures, intensities, etc.).

DESIGN

Our development protocol takes everything into account: ergonomics, weight, ease of handling and sturdiness. The result is a product that is built to last & brings genuine delight. Fermob approaches new product developments with a manufacturer's eye, putting together its own know-how and connecting with the best partners for growth.

To support its growth in the lighting market, Fermob set up a **dedicated working group to combine different areas of expertise**. The brand also partnered up with **Smart & Green**, a start-up in Grenoble **specialising in development of portable and smart LED lights** (using Bluetooth 4.0 Smartmesh® technology).

PRODUCTION

Production is entrusted to the **IPW industrial group** created by a joint French and Chinese team, and working closely with Fermob teams. **Specialising in plastic injection and electronics**, IPW develops LED lighting control software and systems.

Innovative products that are affordable and accessible in terms of price point and ease of use, with strong environmental credentials (eco-designed, able to be taken apart, and energy efficient, due to use of LEDs)

FERMOB: A UNIQUE LIGHTING IDENTITY

Fermob lighting builds on the **fundamentals of the brand**: **ease of use, versatility, continuous innovation, a design approach**. Fermob, in tune with contemporary living, offers a **variety of products for a range of lighting scenarios** (with different light temperatures, intensities, etc.) & different accessories for **a unique user experience, just right for every different moment of life**.

Whether wired or wireless, all Fermob lighting products have something in common - **their simplicity and versatility in use**. Designed for **your table or floor, or to be portable or wall-mounted** Fermob lights offer **complementarity in use**: creating ambience at the table, lighting a bar space, highlighting a poolside area, marking out a path, etc.

A perfect combo for unique user experiences, just right for every different moment of life.

MAKE A LASTING IMPRESSION,

BUT NOT ON THE ENVIRONMENT!

As part of a **continuous improvement** approach, combined with genuine **“lighting quality” expertise**, the brand designs lighting that combines **eco-design with environmentally-friendly materials and processes** to use exactly the right amount of energy. We also pay careful attention to the **life span of our products** and are improving this factor for all of our products.

ECO-DESIGN & DURABILITY

Fermob quality expertise is integrated into our projects from the initial conceptual phase through to design and production. Following marketing, our continuous improvement process allows us to extend the life span of our products.

CONTINUOUS IMPROVEMENT TO REDUCE OUR ENVIRONMENTAL IMPACT

Controlling our industrial processes to reduce their impact on the environment is a major concern for Fermob, as it has been demonstrated regularly in the form of **practical actions**:

- **Lowering the temperature** used for our heating processes (-10°C in 25 years),
- Investment in a **new painting line**, which will be able to save 8 tonnes of powder per year,
- **Reduction in our water consumption** (-43% in 7 years),
- **Reduction in our electricity consumption** with integration of **LED lighting** into our factory (-5% in 5 years).

All our lighting is certified in a 2-stage procedure:

- The product design work includes performance of several tests in accordance with IEC 60598, testing component strength and uses (e.g. NF EN 60529, etc.)
- When Fermob receives the pre-production item, it performs tests on the complete product with SGS.

SGS

IEC 60598: The international standard, for all lighting that incorporates electric light sources, which specifies general requirements for operation at power supply voltages up to 1 000 V. The requirements and the corresponding tests for this standard are concerned with classification, marking and mechanical and electrical construction.

SGS SGS: World leader in inspection, testing, analysis and certification.

SELECTION OF ECO-RESPONSIBLE MATERIALS AND COMPONENTS

LED

Recyclable and far more environmentally-friendly than all other types of lighting. They offer a long life span, with 85% lower energy consumption and no toxic mercury content.

DURABLE AND RECYCLABLE HIGH-PERFORMANCE ELECTRONIC AND ELECTRICAL COMPONENTS

E.g. battery and LED PCB module
(PCB: Printed Circuit Board)

ENVIRONMENTALLY-FRIENDLY PAINTS

Better for the environment and for our health. The powder coatings used by Fermob are **solvent-free**. They are used in a **zero waste system** and are guaranteed for outdoor use.

METAL

An eco-responsible material. Iron and aluminium are **98% recyclable** materials, and have the benefit of a mature value chain at international level.

POLYETHYLENE OR POLYCARBONATE DIFFUSER

Very strong materials, with the benefit of being **recyclable even after being recycled**.

GLASS DIFFUSER

A material that has the benefit of being **85% recyclable**.

DISASSEMBLING LIGHTING TO IMPROVE LIFE SPAN

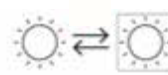

Fermob **considers the design** of its lighting products to **make them easier to disassemble** and **to extend their life span**. Several components can be replaced (see detailed list on p.44 and in Price list).

Each package is marked with **repairability symbols** indicating the **type of disassembly** (requiring a professional or able to be completed by user) and specifying the **type of repairability** (light source and/or control unit).

Detailed key to repairability symbols:

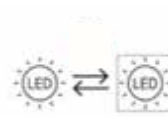

Light source can be replaced by a professional

Light source can be replaced by user

Light source (LED only) can be replaced by a professional

Light source (LED only) can be replaced by user

Control device can be replaced by a professional

Control device can be replaced by user

Light source cannot be replaced

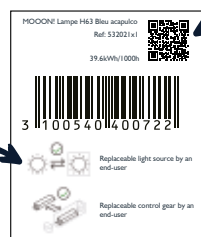

Control device cannot be replaced

Since 1st September 2021, in accordance with the requirements of the AGEC law:

- the new labelling of all household appliances, light sources and lighting products (Light output ≥ 60 lm)
- the new method for analysing energy consumption.

Repairability symbols

QR code giving access to the European database for energy labelling - EPREL.

It fills in the technical information & details (materials, dimensions, energy class, etc.).

WHERE CAN I DISPOSE OF A USED LIGHT?

When disposing of a **used lighting product**, it is mandatory to **disassemble your light and place it at an authorised collection site**. The instructions and packaging give the user information, by means of regulated markings, to ensure that the materials can be recycled or recovered at the end of their life.

Manufacturers and users have **obligations in terms of management of Waste Electrical and Electronic Equipment (WEEE)**. This symbol indicates that the lighting products must not be put in bins intended for household waste.

AT WASTE CENTRES

These sites, generally managed by local authorities, take your used products and transfer them to the appropriate processing systems.

AT SHOPS

Stores that sell these lighting products are obliged to take back the used products, whether they are small independent traders or large specialist shops.

Fermob

AT THE MANUFACTURER'S PREMISES

Manufacturers take back the used products and transfer them to the appropriate processing systems.

Fermob is **affiliated with ECOSYSTEM** for **processing of waste electrical and electronic equipment** and with **Screlec** for **recycling of batteries**, the latter since the start of the Lighting product collections.

ecosystem
recycler c'est protéger

screlec
ensemble vers une économie circulaire

ABS

Acrylonitrile Butadiene Styrene (ABS) is a relatively rigid, lightweight, impact-resistant and mouldable thermoplastic polymer (a type of styrenic polymer, to be exact).

BYPASS

A bypass is a circuit that avoids a device or system.

BATTERY USE CYCLES

The battery's capacity gradually decreases with the use of the light. This is a natural phenomenon. A use cycle includes a complete discharge and recharge of the battery (if the battery is discharged to 50% and then recharged to 100%, this is equivalent to 1/2 cycles). On average, Fermob lights vary between 300 and 500 cycles of use per battery.

LUMINOUS FLUX - LUMEN (Lm)

In photometry, luminous flux is a measure of the power of a light source as perceived by the human eye. It's the most commonly used indicator of the total amount of light emitted by a light source in all directions.

IK INDEX

Defines the strength of a device against knocks and impacts, but not against falls. The test is carried out with a steel vertical or pendulum hammer. The rating ranges from 0 to 10 (according to standard NF 62262).

IP INDEX

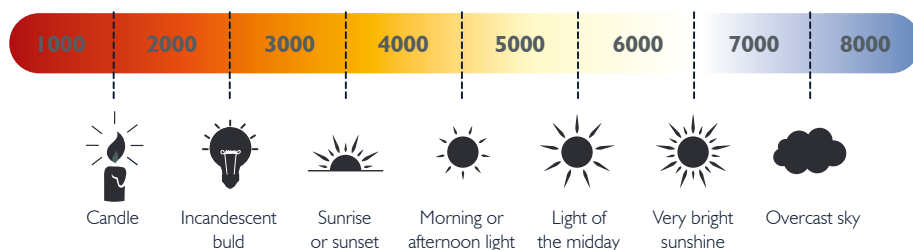

Defines the degree of protection provided by the equipment against the penetration of solid matter (first figure) and liquid matter (second figure). The rating ranges from 00 to 68 (according to standard NF EN 60529).

POLYETHYLENE

Polyethylene is one of the most common thermoplastic resins in use today. It is known for its excellent impact resistance.

COLOUR TEMPERATURE - KELVIN (°K)

Measures the colour temperature of the light. It indicates whether white light is warm (yellow hue) or cool (blue hue). It varies depending on the source. The higher this figure, the more bluish-white the colour temperature, while light with a lower colour temperature tends towards the red end of the scale.

ALTER THE COLOUR TEMPERATURE TO CREATE THE RIGHT LIGHTING MOOD.

This feature lets you adjust the colour temperature to the task at hand. Warm white (2,700 to 3,300°K) creates a comfortable mood that's perfect for relaxing. Neutral white (4,200 to 4,500°K) is more soothing and energising. Cool white (5,500 to 6,500°K) is closest to natural daylight, with a slightly blue hue that boosts focus and concentration.

**MUCH MORE THAN JUST A COLLECTION,
A REAL LIGHTING CONCEPT !**

With its **clever accessories**, the H.24 Aplô lamp offers a **multitude of lighting solutions**, both indoors and outdoors.

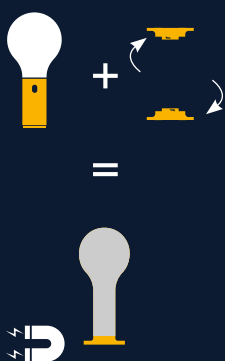

This **wireless LED lamp**, with its clear-cut design, is a concentrate of knowhow: it meets standards of solidity and resistance to outdoor conditions, it's fast charging, and has a long autonomy, with multi-temperature and intensity light power.

365100 - SET OF 3 LAMPS BAMBOO H.12 CM

DESIGN BY TRISTAN LOHNER

Polyethylene diffuser

Bamboo frame

ABS base

Technology: integrated LED - Luminous flux: 20 lm

Switch type: push button

Function of the switch: change the light temperature & brightness (short click, 1 s), OFF (long click, 3 s)

Lighting mood:

Position 1 cool white (6000°K) 100% brightness

Position 2 neutral white (4000°K) 100% brightness

Position 3 candle-style warm white (2300°K) flickering

Type of power supply: battery - Min. Battery life (100%) 10 h

Battery use cycle: 500 cycles

Recharge time: 4h - Type of recharge: USB, cable (supplied) 1,5m

Bypass to prevent battery damage during wired use

0.25 A - 5 V - 0.3 W - IP44 (ingress protection) | IK 10 (impact resistance) | CE | FCC | UKCA

Powered by Smart & Green

FERMOB, A RANGE OF LIGHTING

INNOVATIVE AND CONNECTIBLE

Over the last few years, FERMOb has become the **leading brand in the world of autonomous connectible lighting.**

To work with a variety of lifestyles, the FERMOb catalogue offers a **deco-rative and intelligent solution using Bluetooth technology.**

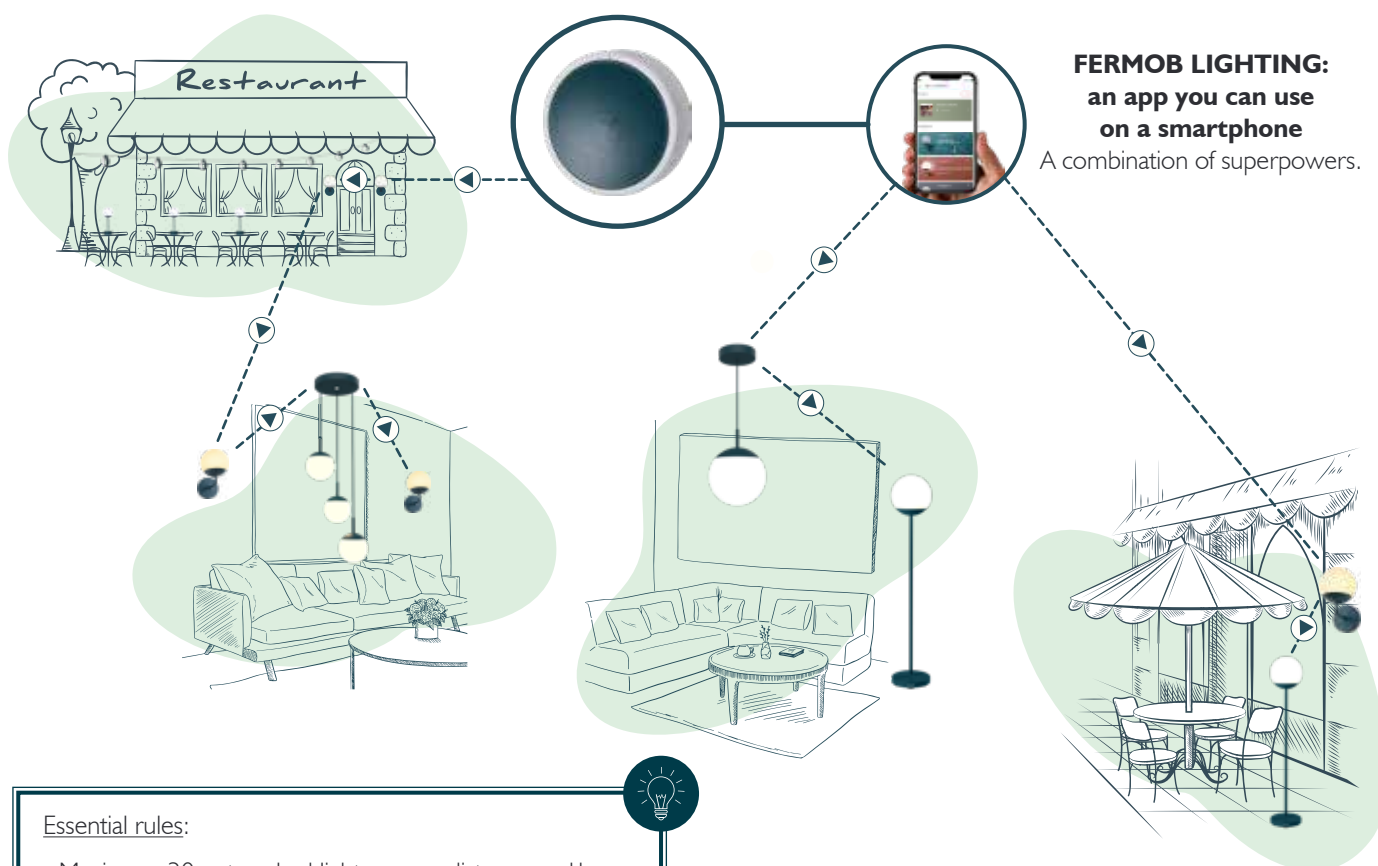

LUDO,

the FERMOb smart switch

A combination of technology to control the lighting atmosphere provided by all FERMOb smart lights.

FERMOB LIGHTING: an app you can use on a smartphone

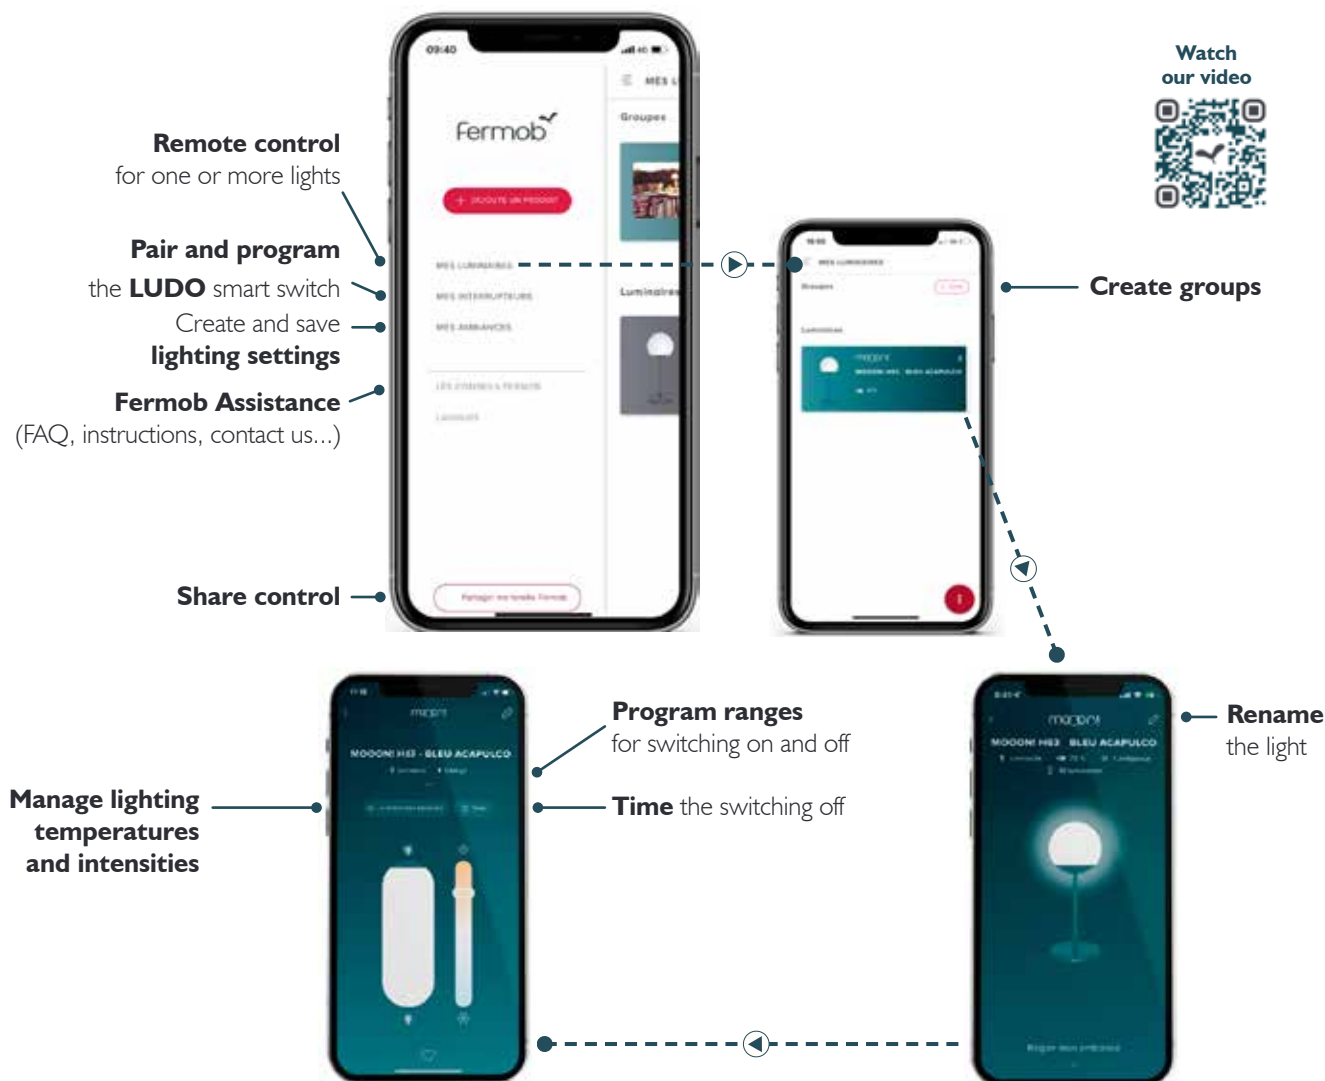

A combination of superpowers.

Essential rules:

- Maximum 30 networked lights over a distance < 1 km
- Distance from smartphone to light < 10m
- Distance from switch to light < 15m
- Distance between lights < 10m
- No obstructions (e.g. wall)

WHAT ARE THE FEATURES OF THE FERMOB LIGHTING APP?

The Fermob Lighting app is compatible with all smartphones equipped with Bluetooth. The app is updated regularly, as products are launched. **MAKE SURE YOU UPDATE IT!**

Any questions?

Go to the Fermob Lighting FAQs on www.fermob.com or directly from the app.

hoopik
LI200

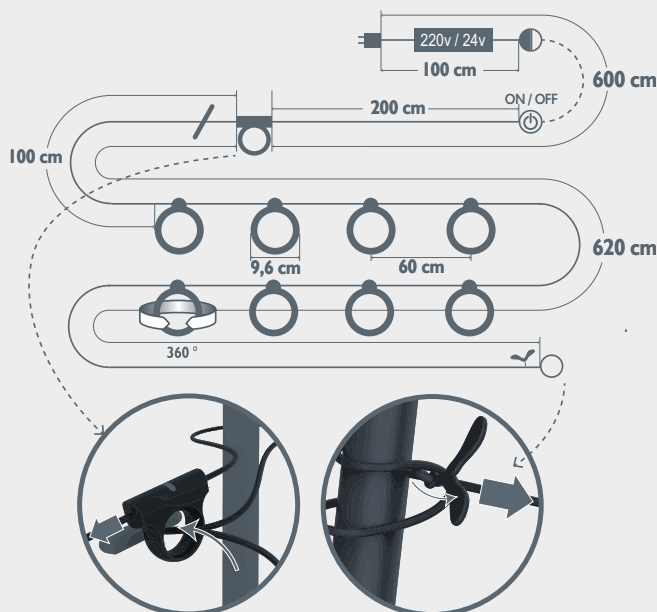

MUCH MORE THAN A GARLAND...

HOOPIK LI 200 is a fully fledged
aerial lighting solution.

It consists of a 12-metre matt black cable, including a 6-metre hanging cable, plus 8 LED spotlights that are adjustable through 360° and 2 hook mechanisms, one at each end.

The dimmer switch, which is easy to access once installed, means it's equally suited to both a muted lounge area and a large, brightly lit table.

What's more, it's equipped with Bluetooth technology and can be controlled remotely with the Fermob Lighting app or the Ludo connected outdoor switch.

PROTECTION & MAINTENANCE

OUR CARE AND MAINTENANCE RECOMMENDATIONS

DURING THE SEASON

- **In the open air:** design + material + surface treatment (anti-UV paint and moisture resistance) allow Fermob furniture to be left outside,
- **Clean your furniture regularly**, more frequently in places with high humidity and in salty environments near the sea,
- Use the **breathable, dirt-resistant protective covers** (Contract – stack covers) to protect solid-top tables, sunloungers and chairs from dead leaves, pine sap and bird droppings.
- Use the **water-repellent protective covers** (Bellevie).

WINTER STORAGE

- To extend the lifespan of your garden furniture, we recommend storing it over **winter in a dry, well-ventilated place** where it will be **protected from impacts**, if at all possible,
- **Clean** and restore the Fermob products if necessary (rust remover / paint touch-up),
- **Place the tables** (and other products) **on leg risers** to create a slope that allows water to drain away,
- **Do not store anything on top of the furniture**, especially objects that may retain water and moisture (such as flower pots and trivets),
- **Do not store the tables stacked with the table tops together**, or the benches stacked with the seats together,
- Ideally, you should **rest your seats against the tables** rather than placing them upside down on top of them,
- **Store folding items of furniture in their folded state**, and under cover if possible,
- **Stack chairs / sun loungers** or other furniture, and store them **under cover** if possible,
- **Wash, then bring in the cushions** and store them away from dust and moisture,
- If you have to chain up your furniture, **use sheathed chains to prevent scratching**.

Never cover the furniture, especially with a non-breathable plastic tarpaulin that will retain moisture, to avoid paint discoloration and stains.

PROTECTING LIGHTS

PROTECTION IN DAILY USE

Fermob lights are quality products that require a few use and storage precautions in order to preserve all their properties and thus extend their life to the maximum.

- **Store in a dry and ventilated area** when not in use,
- **Regularly clean** (more so in areas with high levels of humidity),
- **Recharge in a weatherproof environment** with a temperature between +0 and +40°C,
- **Only use the charging and power supply equipment provided**,
- **Do not let the lamp's battery run flat**,
- **Opt for frequent, short-duration charges**.

A battery's lifespan depends on several factors:

- The environment in which the product is used (temperature, humidity, etc.),
- The environment in which the product is charged (temperature, humidity, etc.).

PROTECTION DURING WINTER/STORAGE

- **Store in a dry and ventilated area**
- **Clean and restore** as required,
- **Store your lamp with its battery partially charged, in a dry, well-ventilated spot**, sheltered from direct sunlight.

CLEANING FURNITURE'S SURFACES

To preserve their original appearance, most of our materials require **basic precautions**. They can be damaged, to a varying extent, depending on the product type, by:

- **mechanical** factors: wear and tear, scratches, impact, distortion, etc.
- **chemical** factors: acids, bases, solvents, etc.

Our surfaces must therefore be cleaned in accordance with the following principles:

- **Systematically carry out a preliminary test on non-visible and restricted areas** to determine compatibility (e.g. under the seat or table top)
- **Do not use abrasive products** or products which may affect the condition of the surface (abrasive sponges, wire wool, pads, scouring creams or powders, dyed textiles which may leave marks, etc.)
- **Do not use aggressive chemicals** (solvents, alkaline detergents, etc)
- Beware of retention zones in which cleaning products can be trapped, leading to further damage
- **Comply with the conditions of use** of the products used (dilution, diffusion, application time, etc.)
- **Do not use high pressure equipment**
- If your table has a solid top, tilt it slightly, using the **Fermob leg risers supplied**, to prevent water from accumulating when it is not in use,
- Avoid prolonged contact with objects that may retain water or moisture (such as flower pots or trivets),
- **Never cover the furniture with non-breathable tarpaulin** or plastic sheeting that will retain moisture,
- Clean off any bird droppings as soon as possible, as these are particularly corrosive.

Our recommendations are as follows:

Use soapy water or
Fermob multi-purpose cleaner.

Apply with a **soft sponge** or a white soft
cloth made of a non-abrasive material.
Rinse with water.

Wipe carefully with
a microfibre cloth to prevent
limescale marks.

For lights rated below IPX4 or with wall-mounted power supply*: **use a clean, damp cloth.**

*Remember to turn off wall switch & cut power.

FOCUS ON MILD MULTI-PURPOSE CLEANER

- Allows you to clean all your Fermob furniture
- Effective on metal (aluminium or painted steel), Outdoor Technical Fabric (OTF), woven resin, synthetic fibres... (Do not use on teak)

The following products may be used but they should be diluted and subject to extensive compatibility testing:

- Ethanol
- Bleach (98% dilution)

We strongly advise against the following non-exhaustive list of products; unless appropriately diluted, they could damage our materials:

- Alcohol, isopropanol
- Petrol, white spirit, solvents, dissolvents
- Hydrocarbons, caustic soda, ammonia
- Alkaline detergents (pH > 9)
- Acids
- Polish
- Products to remove graffiti
- etc.

OUTDOOR TECHNICAL FABRIC (OTF) AND POLYMER THREAD CLEANING

Use soapy water or
Fermob multi-purpose cleaner.

Spray or apply with a **soft sponge**. Rub
gently with a soft brush.
Rinse with water.

Wipe clean.

Very dirty surfaces may require a second application.

FABRIC CLEANING

PRE-WASHING AND ROUTINE CLEANING – Cushion in place on the furniture

Vacuum your cushion or, if there are any stains, quickly dab them to absorb the liquid with a paper towel, cloth or towel.

Wash the fabric with a soft brush and soapy water (washing-up liquid or mild soap), giving special attention to any stains.

Rinse with clean water
Allow to dry in the open air.

WASHING – Removed cushion cover

Machine-wash on a gentle cycle compatible materials, following the recommendations on the label.

Close the zip fasteners first.

Allow to dry in the open air.

Dry-iron the cover if required.

At the end of the season, wash the cushion covers before tidying away/storing your cushions indoors, protected from dust and moisture.

We strongly advise against:

- dry cleaning,
- the use of devices such as high-pressure cleaners, tumble dryers and steam irons
- the use of abrasive liquids.

RESTORATION OF THE FURNITURE

We advise that any scrapes / missing paint should be repaired immediately to prevent corrosion of the metal (steel or aluminium). We recommend this type of touch-up for the parts of your furniture that cannot be seen.

RUSTPROOFING

If you observe minor corrosion on your **steel furniture** (most often located at the welds, rivets, joints, under the tops or under the seats) rivets, joints, under the trays or under the seats) the **Fermob anti-rust spray** will allow you to stop the spread of rust:

Follow the cleaning instructions to **clean the oxidised surface**.
Wipe carefully.

Sand the rusted area with sandpaper (grade 120 to 240), and then **wipe the sanded area with a clean cloth** to remove impurities.

Before using the rust-proofing product, shake the spray can well. Do a test spray onto a piece of cardboard.
Apply the rust-proofing product in a sweeping action.
Allow to dry for 5 to 10 minutes.

Move to the painting stage, where you will be using the **touch-up pen** or the **paint spray**.
You do not need to use a rust remover on **aluminium furniture**. Simply sand and repaint.

PAINT TOUCH-UP

Wear and tear of painted items (scratches, stains, etc.), whether natural or through failure to follow our precautions for use, can be alleviated on Textured shades (but not on Smooth shades) by applying paint spray:

Follow the cleaning instructions to **clean the surface to be painted.**

Wipe carefully.

Before using the paint spray, shake the spray can well. Do a test spray onto a piece of cardboard.

Apply the paint in a sweeping action, starting the application on the outside of the product to avoid any risk of projection.

Allow to dry for 5 to 10 minutes.

A second coat of paint can be applied.

If the item has only had a slight knock, you could use the **touch-up pen** instead.

TREATMENT OF RINGS

A build-up of water combined with exposure to the sun can cause rings (whitish marks) to appear on your furniture.

This can happen if the furniture is not used as per Fermob's recommendations, such as if you:

- Use non-breathable protective covers
 - Use a tarpaulin or plastic sheeting
 - Store objects such as flower pots or trivets on top of the furniture
 - Stack tables top-to-top
 - Stack chairs and benches seat-to-seat or seat-to-table top
 - Store a solid-top table over winter or for a prolonged period of non-use without using a table block.
- Note: The table blocks (supplied with the product and/or available separately) creates a slope to stop water pooling on the table top.

We recommend treating any rings as soon as they appear.

Follow the cleaning instructions to **clean the problem area.**

Wipe carefully.

Use a heat gun (2,000 W, max. 630°C).

Slowly move the heat gun over the problem area, holding it around 5 cm away from the surface.

The rings will gradually disappear.

Allow the surface to cool before using or cleaning the furniture.

ROLL-OUT OF A SOLUTION FOR PROFESSIONALS

We are able to offer to our professional clients a **viable disinfectant solution** with:

- **Two types of hand-held spray bottles**, developed specifically for COVID-19 by the company Berthoud, with a volume of 1 litre (small size) or 5 litres (large size).
- **A professional disinfectant** (called HAGRAL SPRAY SR), ready to use, doesn't require rinsing, is a virucide, according to the decree of 13 March 2020, is **compatible with surfaces which are in contact with food and is colourless and odourless**. A 98% diluted bleach solution may also be appropriate.

Professional disinfectant
HAGRAL SPRAY SR

1 Liter 5 Liters
Hand-held spray bottles
Berthoud

CORRELATIONS ESTABLISHED FOLLOWING APPLICATION TESTS

Large size 5L

- Surface covered **76 m²** (7.5 seconds/m²), or about 50 Alizé sunloungers (15 seconds/sunlounger)

Small size 1L

- Surface covered **15 m²** (15 seconds/m²), or about 30 Bistro chairs (15 seconds/chair)

Under no circumstances can these two services constitute grounds for liability on the part of Fermob with regard to the product's appearance, their virucidal power or any other consequence related to their use.

ADDITIONAL ADVICE

A non-exhaustive list of household products including degreasers, disinfectants, antibacterial products, sanitisers, hydroalcoholic gel, fungicides, virucides and multi-purpose products (Sanytol, Cif, La Croix, Mr Clean, etc.) have been tested in our laboratory. **Most of these commercial products are diluted or have a neutral pH and do not damage our materials.**

This advice is provided in addition and is compatible with the general recommendations above; under no circumstances can this advice constitute grounds for liability on the part of Fermob with regard to the product's appearance, their virucidal power or any other consequence related to their use.

Machine washable at 30°C

MAINTENANCE

2865 - TOUCH-UP SPRAY (150 ML)

Paint spray
Covers up scratches in the exact colour of your furniture
Covers a surface of 0,5–0,6m²

2973 - TOUCH-UP PEN (15 G)

Precision paint touch-up pen
Covers up scratches in the exact colour of your furniture

000920 - RUST-PROOFING PRODUCT (150 ML)

Ready-to-use spray
Stops rust spreading before painting

000901 - MULTI-PURPOSE CLEANER (500 ML)

Ready-to-use spray
For cleaning all Fermob furniture
Works on metal (aluminium or painted steel), Outdoor Technical Fabric (OTF), woven resin, synthetic fibres... (do not use on teak)

SPARE PARTS FOR LIGHTING

Following marketing, our **continuous improvement process** allows us to **improve the user experience** and **extend the life span** of our **durable eco-designed products**.

Fermob **considers the design** of its lighting products to **make them easier to disassemble**. **Several components can be replaced**. See below:
